I am strongly against the changes that are being proposed in relation to Executive Order 14168. These changes are unnecessary and represent an infringement on American rights. There is no reason to require this kind of information on a US passport, and we should not allow identity politics to dictate our laws and policies. This policy only serves to harm transgender people, a marginalized group. This EO does not do anything to protect women, and I feel very confident saying that as a cisgender, biological woman. I resent people using the very real threats of violence that both cis and trans women face as an excuse to oppress trans people. We have bigger problems facing our nation than what someone's birth sex is, and it's embarrassing that this has become such a hot button issue.
