Requiring your assigned sex at birth and requiring it being only male or female is erasure of intersex individuals who are neither male nor female. It's estimated that 1% of all births, which is close to the world population of red headed people (roughly 2%).

Even after all that, the assigned sex at birth doesn't necessarily translate to the person's gender identity and gender expression. This EO is punitive and cruel for transgender, nonbinary, and other gender-nonconforming individuals.
