I am concerned mainly that the "X" marker for a person's sex is being removed. This would force intersex, transgender, and non-binary people to put their sex assigned at birth and not how they identify. Sometimes people, not just those who identify as transgender or non-binary, do not have the "traditional" male or female appearance. This can also have negative impacts on those who currently have the X marker on their passports, causing travel difficulties or blockages. Forcing a "sex at birth" marker on everyone, will subject anyone who might not appear to 'match' their sex marker to uncomfortable questions and harassment. Removing the X marker as an option is a dangerous and harmful change.
