Crazy how you expect my gender to have changed from when I filed my original passport to when I file for my renewal. as a woman I reject Donald's executive order. Stop letting straight white men make laws about our bodies. Stop politicizing the government. Stop wasting our time and money. This is absurd and you should be ashamed. No one is hurting anyone by checking a different box ont heir passport form. In fact, no one would even know, but it makes a world of a difference to people who identify differently from what someone assigned them at birth. No one thinks about what genitals people have as much as white men scared of losing their patriarchal status in this country.
