:usda aphis has been doing a lousy job of protec tion for farm animals for a long long time. their actions have produ ed animal that are very sick because of the abusive conditions under which they are raised. pigs that cant ove when they shoudl be in f afield in the sunshine. cows that are impregnated and then lose their babies immediately where the babies cant even suckle to help the mothers recover. chickens living in warehouses of ammonia. this is aphis the horror of farm raising of animals in america. most other countries are better than we are. usa is at the bottom in terms of abusing farm animals. the very worse.

i dont see how this collection of information will help at all with anything. this agency lies to the us public.

it is dishonest. its findings are political in nature, not real. or honst.when industry and govt collaborate, it turns out criminal, not honest.

i oppose this spending. b ker bk1492@aol.com
