Changing this form to restrict the available sexes to only "male" and "female" will do irreparable harm to thousands of people living here in the US. It is an unnecessary change that will cost taxpayers to implement. It goes against previous court rulings and does not take into account intersex citizens who will have no way to fill out a gender marker that applies to their sex. This will cause confusion as there will be many people with contrasting identification due to this change, making it more difficult for citizens to travel. It is a biological fact that there are more than two sexes, but regardless of that it is not and should never be up to the government as to whether or not my sex is valid. I exist and you should respect my nonbinary sex/gender. The Trump administration is the one pushing extreme sex/gender ideology by claiming we as trans and nonbinary individuals do not exist and that our identities are somehow harmful to women. They don't care about women. They care about hurting trans people. This change will also expose cis women to harassment and invasive policing if the official handling their passport doesn't think they look 'feminine' enough.

Please reject the proposal to erase my sex based on absurd claims by Trump and his administration.
