This policy will be harmful to every person in the US. There are many reasons why someone will change their name, not even just because they are transgender. They get adopted. They enter a witness protection program. They get married. They get divorced. Preventing people from all walks of life their right to have their chosen name displayed on their passport will limit them from traveling and identification purposes. People will not even travel at all if they are forced to have their data corrected and name changed just to have it on a piece of paper. Do not pass this.
