It is extremely important to me as a taxpayer and voter that trans people be able to access passports that reflect their gender identity. Whether it is renewing, applying for the first time, or maintaining their current passport, trans people deserve the same common decency that cis people enjoy. It wasn't very long ago that gay people and women were treated as second class citizens, without rights of their own. If we don't support trans people now, we'll just be repeating the same toxic patterns that have persisted through history. Trans people deserve accurate passports that align with their gender identities.
