People have a right to change their name and have that name on their passport. I do not support this name change restriction. This will affect people getting married and divorced as well. Primarily women.

The premis stated in the notice is ridiculous. Women do not need defending from Gender Ideology Extremism (protection from gov and religious extremism, yes). It is a fallacy to to claim that the federal government needs to restore biological truth that there is only male and female genders. What about those born intersex? What about the millions who do not find themselves cis gendered? Seriously, this completely denies the facts about human sex and sexuality.
