Comments in response to Comments Application for US Passports

Title of Information Collection: Application for a U.S. Passport.

OMB Control Number: 1405-0004.

Form Number: DS-11.

The Executive orders create a burdensome, unnecessary, and purposeful hardship for non-binary people to access passports. This is because the E.O subscribe to only 2 sexes, male and female, where biology is more complicated. There are people with sets of chromosomes other than XY or XX and this has been known for a long time in the medical field. Biology also does not always allow for a big reproductive cell and a small reproductive cell as is foolishly termed in the E.O. There are people who fall outside of those categories. And that is ok, biology is ok and we have been dealing with it as humans for thousands of years.

The medical profession at large supports the biology of a spectrum of genders. This includes general practice, surgical practitioners, and mental health experts worldwide.

Therefore, access to passports will be limited to only certain people.
