I oppose the proposal.

1. this is a waste of government resources. It benefits no one to require sex assigned at birth instead of gender presentation on passport documents. It harms many. It doesn't even help people doing passport control!
 2. it is motivated by animus towards a class of people. There is no reason to do this than to use the force of the government against trans and intersex people.
 3. it is not clear what the information will be used for. If someone's gender presentation does not match their sex assigned at birth, what then? Will they be put on a list?
- America is dedicated to the proposition that we can live freely. This uses the bureaucracy of international travel to stop people from living freely. Our tax dollars should be used to facilitate our passage through the world, not impede it. Please reject.
