DS-11 OMB Control # 1405-0004 Collection: Application for a U.S. Passport

I am a resident of Connecticut and I oppose the new passport policy that forces trans, intersex, and nonbinary people to out themselves any time they have to show ID. This is waste of government dollars because the end result helps no one and harms many people.

I also am concerned about what this information will be used for and could harm people who's presentation does not match their assigned gender at birth.

As a citizen I ask that you deny this application for collection of this data.
