Requiring transgender individuals to hold a passport with a gender marker from their assigned gender at birth rather than their current legal gender is cruel and will have far-reaching negative implications on their mental health and overall well-being. Nobody should be forced to reveal private and sensitive information like that without their consent, as that is humiliating and demeaning, not to mention possibly dangerous depending on who they have been "outed" to. Please change the regulations to allow passport gender markers to be issued based on current legal gender, for the sake of safety and decency.
