This revision to the information collected for a passport is a COMPLETE waste of time and taxpayer money. You are wasting my tax dollars on something that provides NO benefit to anyone. Just the time it will take for someone to read all of these comments - as required by law - will waste untold amounts of money. Your agency should be required to report on the cost of this ridiculousness to the American people.

As if wasting time and money isn't enough, this revision will put people's lives at risk when their "sex" on their passport doesn't match their presentation. Who cares if someone is trans? Doesn't that make their lives difficult enough?

The government is supposed to better the lives of its citizens. This is the opposite.
