I don't even understand how this will work. What will you do about individuals whose original birth certificates had errors on them? What about individuals who are intersex and had their birth certificate changed to reflect their correct gender (or none at all because they are intersex)? What about the human dignity of those who have gone through the arduous process of changing their original birth certificate? This is a complete waste of government resources with no benefits. Instead, gender should be removed from Passports.
