The recent changes to the passport applications are discriminating against transgender people. Trans people are people too, and they deserve the same rights as any other American citizen. In addition, having identity documents that show someone's assigned gender at birth when they present as a different gender is extremely dangerous. Trans people are already subject to discrimination and violence for simply existing, and the passport application changes will only increase that. Under former president Biden, the passport applications were inclusive of transgender people, and there were no issues. Many states also allow changing the gender on state level identity documents, and there were no issues. The only reason to revert these changes is to discriminate against trans people. The important details on the passport are the person's name and photo, not what genitals they were born with. It is very disturbing that the Trump administration is so concerned with what genitals people have.
