Please do not waste taxpayer resources and put American citizens at risk by asking for their assigned at birth gender identity on their passports. It is none of our business, and it exposes trans people to potential discrimination and harm! This is a misguided, transphobic, backwards attempt at controlling trans people and I won't stand for it. Why does the government need that information at all? I am concerned what it would be used for in the future and ask that this harmful, wasteful plan is dropped.
