Please do not make the proposed changes to Passports re changing the term Gender to Sex and requiring an applicant to list their sex assigned at birth. It is not helpful to travelers to have fully transitioned to male and fully look like a man, for example, but have female listed on their passport. This only will cause unnecessary problems while traveling and does nothing to 'Defend Women (or anyone) from Gender Ideology Extremism and Restore Biological Truth.' This doesn't change the reality of transgender people in the world. All it does is cost a lot of time and money (for taxpayers!) and a lot of time and hassle for travelers and officials working with travelers. I would like the government to focus on things that are actual beneficial changes and stop wasting time and money on these things that benefit NO ONE!
