Regarding DS-11, OMB 1405-0004

Why change this if it is likely to be changed back after 4 years? Regardless of what it denies to trans people who have legally changed their "biological and/or assigned sex at birth" this change is already causing problems. This change is a waste of people's time and adds so much unnecessary confusion to the already hectic application process. We're already seeing the ramifications with people having to re-re-apply to correct mistakes made by the department. Leave the application as it was in its pre-2025 state where it doesn't confuse anyone or waste people's time.
