Regarding DS-5504, OMB 1400-0160

Given how the other two proposed changes for forms DS-11 and DS-82 would work if approved, this form would simply serve as further denial to proper passport access for Trans individuals. This form would also make it harder for non-Trans people seeking corrections on their passports. Anyone seeing corrections to gender/sex markers would fall under a "Trans" category under profiling by the state. Overall a waste of time and money.
