I am opposed to this proposed change.

I am a cis, straight woman, but many fine people, including friends and relatives, are intersex, transgender, and non-binary. These proposed changes do nothing to improve security or public safety, but are designed to harass them

.  
The hostility of the current administration has many of these people legitimately fearing for their lives, and denial of passports to these people denies them not just of their freedom to travel, but to find more hospitable homes.

Transgender and non binary people are honest, hardworking, decent people and deserve the same rights as the rest of us.
