Why do our passports need sex or gender in the first place?

Name. Country of citizenry. Photo. marked as ok to travel. what else? why?

Stop targeting a tiny marginalized population. Transgender citizens are people. Making their lives harder is simply cruel and unnecessary. What is Musk/Trump afraid of? Why is their toxic fragile masculinity getting to infiltrate government offices, agencies, etc. decimating much needed services for veterans, education, national parks, and so forth? Stop them. Do not obey in advance- either leave all the markers of sex and gender or take them away. Stop targeting trans folks and get to know these lovely, sacred humans just trying to live their American lives.
