Please do not put trans individuals in any more danger than they are already in. Allow for trans people to use their current gender as their gender marker. This doesn't just affect trans adults. It affects intersex people as well. To alter or diminish their rights is unconstitutional and un-American and I do not want my tax money wasted on this having to be taken to court if people are forced to add a "sex at birth" marker. The government's main purpose is to protect its citizens. Forcing people to accommodate anti-human rights bigots only puts taxpaying Americans in danger with no actual benefit to the citizenry.
