Do not agree with this change. It is imperative to the safety and wellbeing of US citizens to have identification that aligns with their gender. This is even more critical for trans children. While traveling overseas into other countries trans children are at high risk of being taken away from their parents and their parents or legal guardians being detained for suspected child trafficking if their passport details are based on their sex assigned at birth rather than their gender. These individuals lives depend on passports that reflect their gender and not their assigned sex at birth. Also the limitation of this field to solely M or F is biologically inaccurate for intersex persons. If the argument is science based than an option for Intersex should also be available.
