DC-11 is a purposeless waste of taxpayer money: passport offices and agents would waste time making unnecessary changes and spending time to verify the history of a legal document, rather than accepting the legal documentation submitted. Customs agents will take longer to process arrivals because they will have to refer to extra databases to process US citizens. Those agents will have to spend more time interrogating anyone with changes to their gender markers. They are not only cruel, dangerous and unnecessary policies but are also wasteful of taxpayer time and money. There is no functional purpose to these policies; they are clearly directed at harassing and discriminating against a particular minority group.
