I am the parent of a transgender adult child whose legal documents, all of them, have been changed years ago. My child's passport will be up for renewal during the current administration. It is imperative that the renewal process remain smooth for my child, because this is my child's true gender and reverting it would cause confusion since it won't match with appearance at all and it will lead to discrimination, harm and financial burden for legal services to fight it. Please do not disrupt the passport renewal process for transgender people.
