I urge you to reject this proposed policy change that threatens the rights of transgender, intersex and non- binary people in the United States of America. President Trump issued an executive order attempting to erase the existence of trans, intersex, and nonbinary people, and denying them equal rights and treatment under the law. But trans, intersex and non-binary people are valuable members of our communities: our friends, our neighbors, our coworkers, and our family members. I do not support this discrimination. I urge you to reject this policy change.

All of us, including transgender, intersex and non-binary people, need accurate and consistent identity documents that reflect who we are. That's what identification documents are for. These documents allow us to travel, start new jobs, open bank accounts, and enroll in school. Discriminatory, inaccurate identity documents hurt everyone: the state department spends unnecessary resources on discovering assigned sex at birth, the individual gets inaccurate documents and has to explain them, and all receiving agencies get confusing information when people use these documents.

Every citizen deserves a U.S. passport that matches who they are to ensure they can safely travel with dignity and safety, obtain employment, interact with law enforcement, and go about their daily lives without fear of harassment, undue scrutiny, and discrimination.

It is a burden on passport applicants to be asked for evidence of sex assigned at birth, and it is a waste of government time and resources to require State Department employees to research this information. Such measures amount to a violation of right to privacy.

This new policy targets an already marginalized population of the United States and denies them identification documents they need to safely travel and live their lives.

I urge you to reject this policy change –do not take away the rights of trans, intersex, and non-binary citizens to obtain a passport that reflects who they are, a right they've had in the United States for over 30 years.
