This bill serves no purpose other to diminish what little rights intersex and transgender people have. I can't come up with a reasonable explanation as to why it would even be brought into congress! It's going to cause incredible amounts of frustration on both the legal and personal side to everyone involved.

The removal of the unspecified marker is especially terrible. Quite a lot of people are intersex, with estimates ranging from 0.7% to 2%! How are you going to assign them to a specific marker if this law comes to pass? Can't take a look at their birth certificate since that's also unspecified. You would have to go through millions of people on an individual basis, assigning them off the opinion of the poor sods who have to process them! And if you let them choose, what's even the point of this bill? It doesn't even stand up to the make believe reality logic it was built on!

So please, if you're a congress member reading this who's impartial or on the fence about it, deny it for your own sake, if not the millions of people who you represent that would be impacted.

And if you don't, I'll make sure it impacts you just as much as the innocent people who have to deal with the consequences of your actions.
