Title of Information Collection: Application for Passport for Eligible Individuals

DS Form # DS-5504

OMB Control # 1405-0160

This regulation will not assist the Department of State in performing its proper functions, and it will burden those reporting and those receiving the information with unnecessary time consuming work. This regulation is intended solely to punish some Americans for who they are, which is a vile and un-American aim. Freedom of speech should allow passport holders to choose whether or not they wish to have a sex or gender identification on their passport. Sex/gender identification is in no way necessary to properly identify passport holders in the modern age.
