Title of Information Collection: U.S. Passport Renewal Application for Eligible Individuals

DS Form # DS-82

OMB Control # 1405-0020

This regulation will not assist the Department of State in performing its proper functions, and it will burden those reporting and those receiving the information with unnecessary time consuming work. This regulation is intended solely to punish some Americans for who they are, which is a vile and un-American aim. Freedom of speech should allow passport holders to choose whether or not they wish to have a sex or gender identification on their passport. Sex/gender identification is in no way necessary to properly identify passport holders in the modern age.
