fed reg doc e6 20795 - doc noaa omb 0648-0016

logbooks are not accurate sources of any information since they can be so easily doctored by those who will profit from the doctored information. this kind of source of information should be banned since it is subject to such doctoring to gain more profits from this agency. logbooks are in no way any source of sound, honest information.

the overfishing should be stopped no matter what doctored economic information comes to this agency since the info submitted is to gain financial advantage and supports greed.
