SUPPLEMENTARY INFORMATION: Section 322 of the Robert T. Stafford Disaster

Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5165, as amended by the Disaster Mitigation Act of 2000 (DMA 2000) (Pub. L. 106-390), provided the initial framework for linking pre-and post-disaster mitigation planning and initiatives with public and private interests to ensure an integrated, comprehensive approach to disaster loss reduction. Since DMA 2000 amended the Stafford Act, additional laws were passed to help shape hazard mitigation policy. These revisions are included in the Sandy Recovery Improvement Act of 2013, the National Flood Insurance Act of 1968, and the Water Infrastructure Improvements for the Nation Act of 2016. Title 44 Code of Federal Regulations (CFR) Part 201 provides the mitigation planning requirements for state, local, tribal, and territorial governments to identify the natural hazards that impact them, to identify actions and activities to reduce any losses from hazards, and to establish a coordinated process to implement the plan, taking advantage of a wide range of resources. State, local, and Tribal mitigation planning policies provide further guidance regarding mitigation plan development or update, review, and approval.

This proposed information collection was previously published in the **Federal Register** on April 30, 2025, at 90 FR 17945 with a 60-day public comment period. FEMA received seven public comments. Five of the anonymously submitted comments shared general program feedback on the value of hazard mitigation planning. FEMA acknowledges and appreciates these comments. Two comments specifically mentioned administrative burden for plan updates. FEMA acknowledges and appreciates the comments made; the feedback is being taken under consideration for future policy updates. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.
