U.S. PRODUCERS' QUESTIONNAIRE

SLAG POTS FROM CHINA

This questionnaire must be received by the Commission by May 5, 2025

See last page for instructions regarding how to file this questionnaire.

The information called for in this questionnaire is for use by the United States International Trade Commission in connection with its countervailing duty and antidumping investigations concerning slag pots from China (Inv. No. 701-TA-753 and 731-TA-1731 (Final)). The information requested in the questionnaire is requested under the authority of the Tariff Act of 1930, title VII. This report is mandatory and failure to reply as directed can result in a subpoena or other order to compel the submission of records or information in your firm's possession (19 U.S.C. § 1333(a)).

PART I. GENERAL INFORMATION

Background. This proceeding was instituted in response to a petition filed on December 31, 2024, by WHEMCO-Steel Castings, Inc., Pittsburgh, PA. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Pertinent information to this proceeding is available at:

Questionnaires: https://usitc.gov/reports/active import injury questionnaires. Other case information: https://ids.usitc.gov/case/8253/investigation/8719.

<u>Slag pots</u> covered by this proceeding are slag pots with a nominal capacity of 65 cubic feet to 1200 cubic feet regardless of shape, form, or finish.

Slag pots are load bearing devices typically formed as a curved shell or bowl-shaped container. Slag pots are metallurgical goods typically produced either using a casting process or a fabrication process (e.g., welding) and may include a ceramic refractory coating, heat treatment or various finishes in order to handle high temperature slag. Slag pots may contain integral features or attachments including (1) legs (or a stand) and (2) pivotal mounting hooks or brackets. Legs (or a stand) are a fixed or detachable support structure which allows the slag pot to be securely positioned upright on a surface when not being lifted or transported and may also keep the slag pot off the ground and allow for air cooling. The pivotal mounting hooks and brackets are specialized attachment points (such as lifting lugs or trunnions) that allow the slag pot to be securely lifted and transported by a crane or lifting device, or that enable the slag pot to swing or rotate while remaining attached to the lifting mechanism. The merchandise covered by this investigation includes all aforementioned attachments of a fully assembled slag pot, regardless of whether shipped assembled or unassembled.

Slag pots are included within the scope whether finished or unfinished, whether imported individually or with other subject or non-subject merchandise, or whether assembled with attachments or unassembled. Finishing includes, but is not limited to, arc washing, welding, grinding, shot blasting, heat treatment, machining, and assembly of various parts.

The country of origin for slag pots whether fully assembled, unfinished or finished, is the country where the slag pot was cast or forged. Subject merchandise includes slag pots that have been further processed or further assembled in a third country. Further processing and further assembly include, but is not limited to, arc washing, welding, grinding, shot blasting, heat treatment, painting, coating, priming, machining, and assembly of attachments.

Slag pots subject to the investigation are specified within the Harmonized Tariff Schedule of the United States (HTSUS) under subheadings 7309.00.0090 and 8454.20.0080. The slag pot attachments covered by the scope of this investigation may enter under HTSUS subheadings 7316.00.0000, 7325.10.0080, 7325.99.1000, 7325.99.5000, and 7326.19.0080. The HTSUS subheading is provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

Reporting of information. If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

<u>Confidentiality</u>. The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

<u>Verification</u>. The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information. The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

<u>D-GRIDS tool</u>. The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macroenabled MS Excel file available for download from the Commission's generic questionnaires webpage (https://www.usitc.gov/trade_remedy/question.htm) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is <u>optional</u>. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

I-1. Reporting requirements. Please report below the actual number of hours required and the cost to your firm of completing this questionnaire for use by the Office of Management and Budget.

Hours	Dollars

Public reporting burden for this questionnaire is estimated to average 55 hours per response, including the time for reviewing instructions, gathering data, and completing and reviewing the questionnaire.

We welcome comments regarding the accuracy of this burden estimate, suggestions for reducing the burden, and any suggestions for improving this questionnaire. Please provide such comments to the Office of Investigations, import injury@usitc.gov.

I-2a. Establishments covered. Provide the city, state, zip code, and brief description of each establishment covered by this questionnaire. Firms operating more than one establishment should combine the data for all establishments into a single report.

"Establishment" — Each facility of a firm involved in the production of slag pots, including auxiliary facilities operated in conjunction with (whether or not physically separate from) such facilities.

Establishments covered ¹	City, State	Zip (5 digit)	Description

PART II. TRADE AND RELATED INFORMATION

Further information on this part of the questionnaire can be obtained from Jordan Harriman (202-205-2610, <u>Jordan.harriman@usitc.gov</u>). **Supply all data requested on a <u>calendar-year</u> basis**.

II-1.	<u>Contact information</u> . Please identify the responsible individual and the manner by which
	Commission staff may contact that individual regarding the confidential information submitted
	in Part II.

Name	
Title	
Email	
Telephone	

II-2. <u>Changes in operations</u>. Please indicate whether your firm has experienced any of the following changes in relation to the production of slag pots since January 1, 2022.

Check	as many as appropriate.	If checked, please describe the nature, timing / duration, and impact on operations of any such reported changes as well as the business reasons for them; leave completely blank if not applicable
	Plant openings	
	Plant closings	
	Prolonged shutdowns	
	Production curtailments	
	Relocations	
	Expansions	
	Acquisitions	
	Consolidations	
	Weather-related or force majeure events	
	Other (e.g., revised labor agreements, technology)	

II-3a. **Production using same machinery**. Please report your firm's production of products using the same equipment, machinery, or employees as used to produce slag pots, and the combined capacity (both installed and practical capacity) on this shared equipment, machinery, or employees in the periods indicated.

"Installed overall capacity"— The level of production that your establishment(s) could have attained, assuming your firm's optimal product mix, and based solely on existing capital investments, i.e., machinery and equipment that is in place and ready to operate. This capacity measure does <u>not</u> take into account other constraints to production such as existing workforce constraints, availability of raw materials, or downtime for maintenance, repair, and cleanup. This capacity measure is sometimes referred to as "nameplate" or "theoretical" capacity.

"Practical overall capacity"— The level of production that your establishment(s) could reasonably have expected to attain, taking into account your firm's actual product mix over the period. This capacity measure is based on not only existing capital investments, i.e., machinery and equipment that is in place and ready to operate; but also non-capital investment constraints, such as (1) normal operating conditions, including normal downtime for maintenance, repair, and cleanup; (2) your firm's existing in place and readily available labor force; (3) availability of material inputs; and (4) any other constraints that may have limited your firm's ability to produce the reported products. Importantly, this capacity measure is the maximum "practical" production your firm could have achieved without hiring new personnel or expanding the number of shifts operated in the period.

"Practical slag pots capacity"— The level of production of slag pots that your establishment(s) could reasonably have expected to attain. The same assumptions apply to this capacity measure as for practical overall capacity, but only includes the portion of practical overall capacity allocated to the production of slag pots based on the actual product mix experienced over the period.

"**Production**" — All production in your U.S. establishment(s), including production consumed internally within your firm and production for another firm under a toll agreement.

Takes into account	Installed overall capacity	Practical overall capacity	Practical slag pots capacity
Existing capital investments	Yes	Yes	Yes
Product mix	Yes	Yes	Yes
Normal downtime, maintenance, repair and clean-up	No	Yes	Yes
Existing labor force	No	Yes	Yes
Availability of material inputs	No	Yes	Yes
Actual number of shifts and hours operated	No	Yes	Yes
Limited to slag pots	No	No	Yes

II-3a. **Production using same machinery. Continued**

Quantity (in 1,000 pounds)				
	Calendar year			
Item	2022	2023	2024	
Capacity measures: Installed overall capacity ¹				
Practical overall capacity ¹²				
Practical slag pots capacity ^{3 4}	0	0	0	
Production of: Slag pots ^{3 4}	0	0	0	
Other (i.e., out-of-scope) products ⁵				
Total production using same machinery or workers	0	0	0	

¹ Data reported for both "installed overall" and "practical overall" capacity should each individually be greater than data reported for total production (last line). Additionally, data reported for "installed overall" capacity should be greater than "practical overall" capacity in every period.

² Please provide details in your response to the question on capacity constraints in question II-3d below that explain the differences reported between "installed" overall capacity and "practical" overall capacity.

³ Data for this indicator will populate here once reported below in question II-8.

⁴ Data reported for practical slag pots capacity should be greater than the data reported for production of slag pots in each period, if not revise prior to submission to the Commission. Additionally, if your firm reports the production of no other products on the same machinery and using the same workers as slag pots then "practical overall" and "practical slag pots" capacity measures should be equal to each other.

⁵ Please identify these "other products": _____.

II-5. <u>Capacity checklist.</u> Please check that the capacity numbers reported in question II-3a follow the Commission's relevant definitions for capacity.

Item	√ if Yes
Are all three capacity measures reported based on <u>currently installed</u> <u>machinery and equipment</u> (i.e., the reported capacity level would not require additional capital investments in order to achieve)?	
Are practical overall capacity and practical slag pots capacity measures reported based on <u>existing labor force</u> (i.e., the reported capacity level would not require hiring additional production related workers or adding shifts)?	
Are practical overall capacity and practical slag pots capacity measures based on the actual availability of material inputs?	
Do both practical overall capacity and practical slag pots capacity measures account for <u>normal downtime</u> , <u>maintenance</u> , <u>repair and cleanup</u> activities?	
Does the difference between practical overall capacity and practical slag pots capacity equal the portion of practical overall capacity that is dedicated to the production of out-of-scope products?	

Note: If your firm is not able to answer "yes" to any of the above criteria as it relates to your firm's reported capacity levels, please revise your capacity numbers to be in conformance with the appropriate definition prior to submission to the Commission.

II-6. **Tolling**. Since January 1, 2022, has your firm been involved in a toll agreement regarding the production of slag pots?

"Toll agreement" —Agreement between two firms whereby the first firm ("tollee") furnishes the raw materials and the second firm ("toller") uses the raw materials to produce a product that it then returns to the first firm with a charge for processing costs, overhead, etc.

No	Yes	
		If yes, please complete the table below.

Does your firm act as the toller or tollee in this arrangement?	Toller:	Tollee:
Report the share of your firm's production of slag pots that was incluted toll arrangement in 2024.	uded in this	%
Please describe the activities performed in this tolling arrangement:		
Please indicate the name(s) of the firm(s) involved:		

II-7. Foreign trade zones	-/.	Foreign	trade	zones
---------------------------	-----	---------	-------	-------

(a) <u>Firm's FTZ operations</u>. Does your firm produce slag pots in and/or admit slag pots into a foreign trade zone (FTZ)?

"Foreign trade zone" is a designated location in the United States where firms utilize special procedures that allow delayed or reduced customs duty payments on foreign merchandise. A foreign trade zone must be designated as such pursuant to the rules and procedures set forth in the Foreign-Trade Zones Act.

No	If yes, describe the nature of your firm's operations in FTZs and identify the specific FTZ site(s).

(b) Other firms' FTZ operations. To your knowledge, do any firms in the United States import slag pots into a foreign trade zone (FTZ) for use in distribution of slag pots and/or the production of downstream articles?

No	Yes	If yes, identify the firms and the FTZs.

II-8. **Production, shipments, and inventory data**. Report your firm's practical capacity, production, shipments, and inventories of domestically produced slag pots during the specified periods.

"Production" — All production in your U.S. establishment(s), including production consumed internally within your firm and production for another firm under a toll agreement.

"Commercial U.S. shipments" —Shipments made within the United States as a result of an arm's length commercial transaction in the ordinary course of business. Report <u>net values</u> (i.e., gross sales values less all discounts, allowances, rebates, prepaid freight, and the value of returned goods) in U.S. dollars, f.o.b. your point of shipment.

"Internal consumption" — Product consumed internally by your firm. Such transactions are valued at fair market value.

"Transfers to related firms" — Shipments made to related firms. Such transactions are valued at fair market value.

"Related firm" —A firm that your firm solely or jointly owned, managed, or otherwise controlled; a firm that solely or jointly owned, managed, or otherwise controlled your firm; and/or a firm that was solely or jointly owned, managed, or otherwise controlled by a firm that also solely or jointly owned, managed, or otherwise controlled your firm.

"Export shipments" —Shipments to destinations outside the United States, including shipments to related firms.

"Inventories" — Finished goods inventory, not raw materials or work-in-progress.

Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the trade data, as Commission staff may contact your firm regarding questions on the trade data. The Commission may also request that your company submit copies of the supporting documents/records (such as production and sales schedules, inventory records, etc.) used to compile these data.

II-8. Production, shipment, and inventory data. Continued

II-12. <u>Employment data</u>. Report your firm's employment-related data related to the production of slag pots in your U.S. establishments and provide an explanation for any trends in these data.

"Production and Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12.

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid" —Total wages paid before deductions of any kind (e.g., withholding taxes, oldage and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

	Calendar year		
Item	2022	2023	2024

II-13.	<u>Transfers to related firms</u> . If your firm reported transfers to related firms in question II-8, please identify the firm(s) and indicate the nature of the relationship between your firm and the
	related firms (e.g., joint venture, wholly owned subsidiary), whether the transfers were priced at market value or by a non-market formula, whether your firm retained marketing rights to all transfers, and whether the related firms also processed inputs from sources other than your firm.

II-14. <u>Purchases</u>. Has your firm purchased slag pots produced in the United States or in other countries since January 1, 2022? (Do not include imports for which your firm was the importer of record. These should be reported in an importer questionnaire.)

"Purchase" —A transaction to buy product from a U.S. corporate entity such as another U.S. producer, a U.S. distributor, or a U.S. firm that has directly imported the product.

"Import" —A transaction to buy from a foreign supplier where your firm is the importer of record.

No	Yes	If yes, report such purchases in the table below and explain the reasons for your firms' purchases.

Note: If your firm served as the importer of record for any purchases from foreign suppliers, either for your own account or as a service for another entity, those purchases are to be considered "imports" not "purchases" and **should not** be included in the table below

(Quantity in 1,000 pounds)

III-2.	Accour	When do	em . Briefly describe your firm's finance oes your firm's fiscal year end (month irm's fiscal year changed since Januar	n and day)?

A.2.	Note: Calendar-year data are preferred for the annual-year financial data in this section
	(i.e., in questions III-9a, III-9d, III-12a, and III-13a). However, if providing this data on a
	calendar-year basis is unduly burdensome or provides results that are not reliable,
	fiscal-year based data are acceptable. Please indicate whether the results in this section
	are provided on a calendar-year basis (including firms with a calendar-year based fiscal
	year) or on a fiscal-year basis that does not align with the calendar year.

B.1.	Describe the lowest level of operations (e.g., plant, division, company-wide) for which
	financial statements are prepared that include slag pots:

Fiscal-year basis (does not align with the calendar year)

B.2.	Does your firm prepare profit/loss statements for slag pots:

B.3. Please indicate the type and frequency (if applicable) of financial statements prepared by your firm. Please check relevant items below.

	Yes	No	If no, provi	de an explanation and the valuating III-9a.	ion basis used for these inputs

III-8. Cost assignment/allocation basis. Briefly describe the assignment/allocation bases used by your firm to assign the costs and expenses listed below for slag pots in the normal course of business and in the financial results reported in question III-9a (e.g., actual costs, standard costs, percentage of COGS, percentage of sales, etc.).

	Assignment/allocation bases used for slag pots			
Cost/expense	In the normal course of business	In the financial results at III-9a		
Raw materials				
Direct labor				
Other factory costs				
SG&A expenses				
Interest expense				
Other income/expenses				

III-9a. <u>Operations on slag pots</u>. Report the revenue and related cost information requested below on the slag pots operations of your firm's U.S. establishment(s). Include only sales (whether domestic or exports) and costs related to your U.S. manufacturing operations. <u>Do not</u> report any revenue or cost data related to the resale of purchased product.

Net sales—Report all commercial sales, internal consumption, and transfers to related firms, whether these are domestic sales or exports. Report net sales values less discounts, returns, allowances, and prepaid freight, in U.S. dollars, f.o.b. your point of shipment. The freight costs associated with delivering the product to your customer should not be included.

Note: If the financial data are reported on a calendar-year basis, the total net sales quantities and values should match the total shipment quantities and values reported in Part II of this questionnaire (see question III-14 for a reconciliation grid).

Internal consumption—Product consumed internally by your firm. Report internal consumption at fair market value even if this is not how these transactions are valued in your own books and records. This would commonly be estimated based on the company's commercial sales of similar product or market knowledge.

Transfers to related firms—Sales made to related firms. Report transfers to related firms at fair market value even if this is not how these transactions are valued in your own books and records. This would commonly be estimated based on the company's commercial sales of similar product or market knowledge.

Costs and expenses—Include costs and expenses associated with all reported net sales (i.e., for both domestic and export commercial sales, internal consumption, and transfers to related firms). If any freight costs were removed from net sales values, ensure the associated costs are removed from the applicable cost/expense line.

Inputs from related suppliers—Any inputs purchased from related suppliers should be reported in a manner consistent with your firm's accounting books and records.

Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the financial data, as Commission staff may contact your firm regarding questions on the financial data. The Commission may also request that your company submit copies of the supporting documents/records (financial statements, including internal profit-and-loss statements for the division or product group that includes slag pots, as well as specific statements and worksheets) used to compile these data.

¹ Please describe the alloying agent(s) or metal(s) used in the production of slag pots:

² If there are notable or significant raw material inputs included within the "Other raw material inputs" category, please list those here and provide the share of the total raw material costs for which they account:

III-9b. <u>Financial data reconciliation</u>. Certain line items from question III-9a, including total net sales quantities and values, total COGS, gross profit (or loss), operating profit (or loss), and net income (or loss), have been calculated based on the data submitted for other line items. Are the data in these calculated line items correct according to your firm's financial records ignoring non-material differences that may arise due to rounding?

		If noIf the calculated line items do not show the correct data, please double check the feeder data for data entry errors and revise. Also, check signs accorded to the post operating income line items. The two expense line items should report positive numbers (i.e., expenses are positive, and incomes or reversals are negative in these lines – instances of the latter should be rare in these lines). The income line item should also, in most instances, be a positive number (i.e., income is positive, and expenses or reversals are negative in this line).
Yes	No	If, after reviewing and potentially revising the feeder data your firm has provided, the differences between your records and the calculated line items persist, please identify and discuss the differences in the space below.

III-9c. Raw materials. Please indicate the procurement method for raw material costs in 2024 (reported in III-9a) for the following raw material inputs:

PRICE DATA

IV-2. This question requests quarterly quantity and value data for your firm's commercial shipments to unrelated U.S. customers since January 1, 2022 of the following products produced by your firm.

Product 1.--635 Ft³ Slag Pot

Product 2.--900 Ft³ Slag Pot

Product 3.--600 Ft³ Slag Pot

Product 4.--1050 Ft³ Slag Pot

Please note that values should be <u>f.o.b.</u>, <u>U.S.</u> <u>point of shipment</u> and should not include U.S.-inland transportation costs. Values should reflect the *final net* amount paid to your firm (i.e., should be net of all deductions for discounts or rebates).

IV-2a. During January 2022-December 2024, did your firm produce and sell to unrelated U.S. customers any of the above listed products (or any products that were competitive with these products)?

Yes: Please complete the following pricing data table as appropriate.
No: Skip to question IV-3.

IV-2b. Price data. Report below the quarterly price data¹ for pricing products² produced and sold by your firm.

Report data in *actual pounds* (not 1,000 pounds) and *actual dollars* (not \$1,000s).

		(Quantity in pounds, value in dollars)						
	Produ	ct 1	Produ	ct 2	Produ	ct 3	Produ	ct 4

U.S. Pro	oducers' Qu	estionnair	re: Slag Pots (Final) Page 44
IV-15.		_	eve there been any significant changes in the product range, product mix, or ts since January 1, 2022?
	No	Yes	If yes, please describe and quantify if possible.
IV-16.	Business c		ne slag pots market subject to business cycles, either during the year or describe.
	No	Yes	If yes, please describe, including any changes since January 1, 2022.
IV-17.		-	etition. Is the slag pots market subject to conditions of competition ts other than the business cycles described in the previous question? If yes,
	No	Yes	If yes, please describe, including any changes since January 1, 2022.

IV-18. S	Supply con	straints.
-----------------	------------	-----------

(a) Has your firm refused, declined, or been unable to supply slag pots at any time since January 1, 2022 (examples include placing customers on allocation or "controlled order entry," declining to accept new customers or renewing existing customers, delivering less than the quantity promised, being unable to meet timely shipment commitments, impact from changes in operations listed in II-2a, etc.)?

No (skip to next question)	Yes (respond to part b)	

(b) For each year that your firm faced supply constraints, describe the constraints with the details requested below. For constraints that span multiple years, check all years they exist and describe how they vary over time, if at all.

Period	Check if yes	Describe, including the timing, duration, and reason for the constraint.
2022		
2023		
2024		

(c) Were there any specific supply constraints, listed in part b or otherwise, related to the petition that was filed on December 31, 2024?

No	If yes, please describe the constraints that were related to the petition being filed and their impacts.

IV-19. Raw materials. Have slag pots raw material prices steadily increased, fluctuated but ended higher, not changed, fluctuated but ended lower, or steadily decreased since January 1, 2022?

Select one box per row.

Steadily increase	Fluctuate up	No change	Fluctuate down	Steadily decrease	Explain, noting how raw material price changes have affected your firm's selling prices for slag pots.

IV-20. <u>Interchangeability by country-pair</u>. How often are slag pots produced in the United States and in other countries interchangeable (i.e., can they physically be used in the same applications)?

Please indicate A, F, S, N, or 0 in the table below:

- A = the products from a specified country-pair are *always* interchangeable
- F = the products are *frequently* interchangeable
- S = the products are *sometimes* interchangeable
- N = the products are *never* interchangeable
- 0 = *no familiarity* with products from a specified country-pair

Country-pair	China	Other countries
United States		
China		

For any country-pair producing slag pots that are *sometimes* or *never* interchangeable, identify the country-pair and explain the factors that limit or preclude the interchangeable use of slag pots produced in the countries:

IV-21. <u>Interchangeability by product-pair</u>. How often are *cast* slag pots and *fabricated* slag pots interchangeable (i.e., can they physically be used in the same applications)?

Please indicate A, F, S, N, or 0 in the table below:

- A = the products are *always* interchangeable
- F = the products are *frequently* interchangeable
- S = the products are *sometimes* interchangeable
- N = the products are *never* interchangeable
- 0 = *no familiarity* with products

Fabricated slag pots

If you indicated that these products are *sometimes* or *never* interchangeable, explain the factors that limit or preclude the interchangeable use of *cast* and *fabricated* slag pots:

IV-22. Factors other than price. How often are differences other than price (e.g., quality, availability, transportation network, product range, technical support, etc.) between slag pots produced in the United States and in other countries a significant factor in your firm's sales of the products?

Please indicate A, F, S, N, or 0 in the table below:

A = such differences are *always* significant

			e <i>frequently</i> sigr e <i>sometimes</i> sig				
	N = such	differences a	re <i>never</i> significa	nt			
	0 = no fai	<i>miliarity</i> with	products from a	specified cou	ntry-pair		
	Country-pair		China		Other countries		
	United States

	factor in your fi	rm's sales of	slag pots, identif	y the country	always or frequently a signif pair and the relevant factors parted by such factors:		
IV-23.	Role of section 301 tariffs. Did the tariffs on Chinese-origin products under section 301, or changes in these tariffs, have an impact on the slag pots market in the United States, including any effects on slag pots cost, price, supply, and/or demand, since January 1, 2022?						
	Yes		No)	Don't know		
	If yes, please des the timing of suc	•	pact on cost, prid	e, supply, an	d/or demand, and include		
IV-24. Role of section 232 measures. Did the measures (e.g., tariffs, quotas, etc.) on imported steel/aluminum products under section 232, or changes in the measures (such as the coverage, or nature of the measures), have an impact on the slag pots market in the US States, including any effects on slag pots cost, price, supply, and/or demand, since Jan 2022?					ne measures (such as the leve slag pots market in the Unit	ed	
	Yes		No)	Don't know		

Yes	No	Don't know

If yes, please describe the impact on cost, price, supply, and/or demand, and include the timing of such impacts.	

IV-25.	Role of new or modified tariffs. Have tariff announcements and tariff changes associated with
	recent executive orders since January 1, 2025 (e.g., changes in country or "reciprocal" tariffs)
	impacted the slag pots market in the United States, including any effects on price, supply,
	demand, and/or raw material costs?

Yes	No	Don't know			
If yes, please describe the impact on cost, price, supply, demand, and/or raw material costs, and include the timing of such impacts.					

IV-26. <u>Customer identification</u>. List the names and contact information for your firm's 10 largest U.S. customers for slag pots since January 1, 2022. Indicate the share of the quantity of your firm's U.S. shipments of slag pots that each of these customers accounted for in 2024.

Customer's name	City	State	Share of 2024 sales (%)

IV-27. Competition from imports.

(a) <u>Lost revenue</u>. Since January 1, 2022: To avoid losing sales to competitors selling slag pots from China, did your firm:

Item	No	Yes
Reduce prices		
Roll back announced price increases		

(b) <u>Lost sales</u>. Since January 1, 2022: Did your firm lose sales of slag pots to imports of this product from China?

No	Yes

IV-28.	Other explanations. If your firm would like to further explain a response to a question in Part IV
	for which a narrative response box was not provided, please note the question number and the
	explanation in the space provided below. Please also use this space to highlight any issues your
	firm had in providing the data in this section.

HOW TO FILE YOUR QUESTIONNAIRE RESPONSE

This questionnaire is available as a "fillable" form in MS Word format on the Commission's website at:

https://usitc.gov/reports/active import injury questionnaires.

Please do not attempt to modify the format or permissions of the questionnaire document. Please submit the completed questionnaire using one of the methods noted below. If your firm is unable to complete the MS Word questionnaire or cannot use one of the electronic methods of submission, please contact the Commission for further instructions.

• <u>Upload via Commission's secure submission portal</u>. The questionnaire must be uploaded in two formats: (1) a Microsoft Word document; and (2) a PDF copy of the complete questionnaire with a signature on the first page. Please include any attachments at the end of the PDF (e.g., APO certification, additional comments, etc.).

Web address: https://usitc.gov/qportal Pin: POTS Phase: Final

• E-mail. E-mail the MS Word questionnaire to <u>jordan.harriman@usitc.gov</u>; include a PDF copy of the complete questionnaire with a signature on the first page. Submitters are strongly encouraged to encrypt nonpublic documents that are electronically transmitted to the Commission to protect your sensitive information from unauthorized disclosure. The USITC secure submission portal and the Electronic Document Information System (EDIS) use Federal Information Processing Standards (FIPS) 140-2 cryptographic algorithms to encrypt data in transit. Submitting your nonpublic documents by a means that does not use these encryption algorithms (such as by email) may subject your firm's nonpublic information to unauthorized disclosure during transmission. If you choose a non-encrypted method of electronic transmission, the Commission warns you that the risk of such possible unauthorized disclosure is assumed by you and not by the Commission.

If your firm does not produce this product, please fill out page 1, print, sign, and submit a scanned PDF copy via the Commission's secure submission portal or email.

<u>Parties to this proceeding</u>. If your firm is a party to this proceeding, it is required to serve a copy of the completed questionnaire on parties to the proceeding that are subject to administrative protective order (see 19 CFR § 207.7). A list of such parties may be obtained from the Commission's Secretary (202-205-1802). A certificate of service must accompany the completed questionnaire you submit (see 19 CFR § 207.7). Service of the questionnaire must be made in paper form.
