

Justification for a Nonsubstantive Change
Section 1115 Demonstration Projects
CMS-10341, OMB 0938-1162

Our active collection of information request was approved by OMB on March 10, 2025. While the 60-day Federal Register notice did not receive public comment, our 30-day notice received three (two from separate non-profit organizations and one from a state health foundation).

The purpose of this April 2025 nonsubstantive change request is to attach the original comments along with a summary of the comments and our response.

Importantly, please note that we are not proposing to change any of our active requirements or burden estimates as a result of the comments. Similarly, we are not proposing to change our active Supporting Statement. The only change is attaching the original comments and our response.

Our active collection of information request does not include any collection of information instruments/instructions. Instead, all requirements are set out in the CFR.
