

## FOREIGN PRODUCERS'/EXPORTERS' QUESTIONNAIRE

### LATTICE BOOM CRAWLER CRANES ("LBCCs") FROM JAPAN

This questionnaire must be received by the Commission by **April 24, 2025**  
*See last page for instructions regarding how to file this questionnaire.*

The information called for in this questionnaire is for use by the United States International Trade Commission in connection with its antidumping investigation concerning lattice boom crawler cranes ("LBCCs") from Japan (Inv. No. 731-TA-1742 (Preliminary)). The information requested in the questionnaire is requested under the authority of the Tariff Act of 1930, title VII.

Name of firm \_\_\_\_\_

Address \_\_\_\_\_

Website \_\_\_\_\_

Has your firm produced or exported LBCCs in Japan (as defined on next page) at any time since January 1, 2022?

☐ **NO** (Sign the certification below and promptly return **only** this page of the questionnaire to the Commission)

☐ **YES** (Complete all parts of the questionnaire, and return the entire questionnaire to the Commission)

Return questionnaire via the Commission's secure portal by clicking on the following link:  
<https://usitc.gov/qportal>. PIN: **LIFT**, Phase: **Preliminary**). See last page for detailed instructions.

#### CERTIFICATION

*I certify that the information herein supplied in response to this questionnaire is complete and correct to the best of my knowledge and belief and understand that the information submitted is subject to audit and verification by the Commission. By means of this certification I also grant consent for the Commission, and its employees and contract personnel, to use the information provided in this questionnaire and throughout this proceeding in any other import-injury proceedings conducted by the Commission on the same or similar merchandise.*

*I, the undersigned, acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceedings may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. I understand that all contract personnel will sign appropriate nondisclosure agreements.*

**PART I. GENERAL INFORMATION**

**Background.** This proceeding was instituted in response to a petition filed on April 10, 2025, by The Manitowoc Company, Inc., Milwaukee, WI. Antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of dumping. Pertinent information to this proceeding is available at:

Questionnaires: [https://usitc.gov/reports/active\\_import\\_injury\\_questionnaires](https://usitc.gov/reports/active_import_injury_questionnaires).

Other case information: <https://ids.usitc.gov/case/8277/investigation/8729>.

**LBCCs** covered by this proceeding consist of lattice boom crawler cranes, and lattice boom crawler crane assemblies. LBCCs combine the assemblies defined below, among other components, including an undercarriage fitted with tank-link crawler tracks, an upper carriage housing the operator cab, engine, and hydraulics, and a boom made of steel pipe welded together in a distinctive lattice pattern. The scope of this investigation covers LBCCs and LBCC assemblies, whether assembled or unassembled, and whether or not the LBCC contains any additional features that provide for functions beyond the primary lifting function. All LBCCs are included in the scope regardless of maximum lift capacity, lattice boom length, jib configuration, or other added features.

Subject merchandise includes, but is not limited to, the following LBCC assemblies which can be imported in isolation or combined in different configurations at the time of import:

- Lattice boom assemblies and pieces thereof. Lattice boom assemblies are formed of interlocking sections of welded high-strength steel pipe, that form the lifting attachment of the crane. A lattice boom is formed by welding main chords together, typically with lacing chords arranged in a "W" or "V" pattern. Lattice boom assemblies consist of a boom butt (also known as a boom bottom or boom base), which attaches to the upper carriage assembly, and a boom head (also known as a boom tip or boom hat), which forms the other end of the boom structure. In between the boom butt and boom head, boom inserts of various lengths can be inserted to reach the desired boom height and load bearing capability. Lattice boom assemblies may be imported with boom butt, boom tip, and boom inserts together, but boom butt, boom tip, and boom inserts imported alone are also covered by the scope.
- Lower carriage assembly. The lower carriage assembly (also may be referred to as a carbody or lower works) is constructed with high-strength steel components and forms the base of the crawler crane. The lower carriage assembly typically includes various motors, drive mechanisms, and hydraulics. The lower carriage assembly may also include a set of counterweights to provide backward stability for the assembled crane. The lower carriage typically has a circular center that is connected to the upper carriage assembly with a bearing. The lower and upper carriage assemblies may or may not be connected by a bearing at the time of importation. Steel arms extend from the center of the lower carriage and connect to the front and rear of the crawler assemblies that are positioned on both sides of the lower carriage assembly. The lower carriage assembly may also contain a hydraulic system that allows for the extension and retraction of the crawler assemblies to create a wider base. A lower carriage assembly may be imported with or without crawler assemblies.
- Crawler assembly. Each lattice boom crawler crane contains at least two crawler assemblies, which are continuous tracks that provide mobility and distribute the crane's weight evenly across the ground. The tracks of a LBCC consist of steel track shoes, which are interlocking steel plates that form the tread of the tracks and make direct contact with the ground, a track chain,

which is a continuous loop of interconnected steel links, and a crawler body and track rollers, which support the track shoes and track chain. Typically, drive motors mounted on the lower carriage assembly connect to crawler-mounted drive sprockets, which engage the track chain and allow the LBCC to move forward and backward.

- Upper carriage assembly. The upper carriage assembly, also known as the upper works, typically includes the operator's cab, hydraulic systems, engine, boom hoist, mast, and a turntable base with swing drive mechanism that connects to the lower carriage assembly and allows the upper carriage to pivot on the undercarriage. The upper and lower carriage assemblies may or may not be connected by a bearing at the time of importation. The upper carriage assembly may also include a separate counterweight tray and counterweights, which allow the crane to maintain balance while lifting heavy loads, as well as a gantry, which helps lift the counterweights for installation or removal, although the counterweight tray, counterweights, and gantry are not required to be attached for the upper carriage assembly to be a subject assembly. The boom butt may or may not be attached to the upper carriage assembly at the time of entry.
- Hoisting assembly. The hoisting assembly, housed within the upper carriage assembly and lattice boom assembly, powers the lifting and lowering of loads and typically consists of a hoisting line of high strength steel cable, a hoist motor, hoist brakes, hoisting drums, and a hook block formed from steel sheaves, which helps distribute the load on the hoisting line and increases lifting capacity. The main hoisting line typically runs from the hoist drums, housed in the upper carriage assembly, up through the lattice boom (which may or may not house additional hoist drums) and hook block.
- Jib assemblies. Jib assemblies are optional components that can be added to the top end of the boom to provide the crane with greater reach. Similar to lattice boom assemblies, jib assemblies typically consist of interlocking sections of welded steel pipe, arranged in a "V" or "W" lattice pattern. Jib assemblies can consist of either fixed jib, which extends from the main lattice boom at a fixed angle, or a luffing jib, which can be raised or lowered by the operator through a separate set of controls.

Importation of any of these assemblies, whether assembled or unassembled, constitutes unfinished LBCCs for purposes of this investigation. Inclusion of other components not identified as comprising the finished or unfinished LBCCs and LBCC assemblies do not remove the products from the scope.

Processing of LBCCs and LBCC assemblies such as welding, joining, bolting, painting, coating, finishing, or assembly, either in the country of manufacture of the in-scope product or in a third country does not remove the product from the scope. LBCCs and LBCC assemblies subject to this investigation include those that are produced in the subject country whether assembled with other components in the subject country or in a third country. Processing or completion of finished and unfinished LBCCs and the covered LBCC assemblies either in the subject country or in a third country does not remove the product from the scope.

Importation of any of these assemblies, whether assembled or unassembled, constitutes unfinished LBCCs for purposes of this investigation. Inclusion of other components not identified as comprising the finished or unfinished LBCCs and LBCC assemblies do not remove the products from the scope. Processing of LBCCs and LBCC assemblies such as welding, joining, bolting, painting, coating, finishing, or assembly, either in the country of manufacture of the in-scope product or in a third country does not remove the product from the scope.

LBCCs and LBCC assemblies subject to this investigation include those that are produced in the subject country whether assembled with other components in the subject country or in a third country. Processing or completion of finished and unfinished LBCCs and the covered LBCC assemblies either in the subject country or in a third country does not remove the product from the scope. LBCCs subject to this investigation are typically classifiable under subheadings 8426.49.0010 and 8426.49.0090 of the Harmonized Tariff Schedule of the United States (HTSUS). LBCC assemblies may also be classified under subheadings 8426.49.0010 or 8426.49.0090, or may be classified under subheadings 8431.49.1090, 8431.49.1010, 8431.49.1060, 8487.90.0080, or 8425.19.0000 of the HTSUS. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise under investigation is dispositive.

**Reporting of information.** If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, purchaser and/or foreign producer questionnaire), you need not respond to duplicated questions.

**Confidentiality.** The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (*see* 19 U.S.C. §1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

**Verification.** The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

**Release of information.** The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

**Valid number error messages.** If you are completing this form in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 rather than \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete this form. Detailed instructions on how to resolve this issue are provided at the end of this questionnaire and are available upon request from Laurel Schwartz (202-205-2398, Laurel.Schwartz@usitc.gov).

I-1. **Reporting requirements.** Please report below the actual number of hours required and the cost to your firm of completing this questionnaire for use by the Office of Management and Budget.

Hours	Dollars

Public reporting burden for this questionnaire is estimated to average 30 hours per response, including the time for reviewing instructions, gathering data, and completing and reviewing the questionnaire.

We welcome comments regarding the accuracy of this burden estimate, suggestions for reducing the burden, and any suggestions for improving this questionnaire. Please provide such comments to the Office of Investigations, [import\\_injury@usitc.gov](mailto:import_injury@usitc.gov).

- I-2. **Establishments covered.** Provide the name and address of establishment(s) covered by this questionnaire.

***“Establishment”*** —Each facility of a firm in Japan involved in the production or export of LBCCs, including auxiliary facilities operated in conjunction with (whether or not physically separate from) such facilities. Firms operating more than one establishment in Japan should combine the data for all establishments into a single report.

--

***“Related firm”*** —A firm that your firm solely or jointly owned, managed, or otherwise controlled; a firm that solely or jointly owned, managed, or otherwise controlled your firm; and/or a firm that was solely or jointly owned, managed, or otherwise controlled by a firm that also solely or jointly owned, managed, or otherwise controlled your firm.

- I-3. **Related producers.** Does your firm or any related firm produce, have the capability to produce, or have any plans to produce LBCCs in the United States or other countries?

No	Yes	If yes, please name the firm(s) and country(ies) below and, if U.S. producer(s), ensure that they complete the Commission’s U.S. producers’ questionnaire.
<input type="checkbox"/>	<input type="checkbox"/>	

- I-4. **Related U.S. importers.** Does your firm or any related firm import or have any plans to import LBCCs into the United States?

No	Yes	If yes, please name the firm(s) below and ensure that they complete the Commission’s importer questionnaire.
<input type="checkbox"/>	<input type="checkbox"/>	

- I-5. **Stock symbol information.** If your firm or any of the entities reported in questions I-2 through I-4 are publicly traded in the United States, please specify the stock exchange and trading symbol (including American Depositary Receipts, if applicable): \_\_\_\_\_.

- I-6. **External counsel.** If your firm or parent firm is represented by external counsel in relation to this proceeding, please specify the name of the law firm and the lead attorney(s).

Law firm:	
Lead attorney(s):	

I-7. **U.S. importers.** Please provide the names, contacts, telephone numbers, and e-mail addresses of the **TEN** largest U.S. importers of your firm's LBCCs since January 1, 2022.

Importer's name		Contact person	Email	Telephone	Share of your firm's 2024 U.S. exports (%)

**PART II. TRADE AND RELATED INFORMATION**

Further information on this part of the questionnaire can be obtained from Laurel Schwartz (202-205-2398, [Laurel.Schwartz@usitc.gov](mailto:Laurel.Schwartz@usitc.gov)). **Supply all data requested on a calendar-year basis.**

- II-1. **Contact information.** Please identify the responsible individual and the manner by which Commission staff may contact that individual regarding the confidential information submitted in Part II.

Name	
Title	
Email	
Telephone	

- II-2a. **Changes in operations.** Please indicate whether your firm has experienced any of the following changes in relation to the production of LBCCs since January 1, 2022.

<i>Check as many as appropriate.</i>		<i>If checked, please describe the nature, timing / duration, and impact on operations of any such reported changes as well as the business reasons for them; leave completely blank if not applicable</i>
<input type="checkbox"/>	Plant openings	
<input type="checkbox"/>	Plant closings	
<input type="checkbox"/>	Prolonged shutdowns	
<input type="checkbox"/>	Production curtailments	
<input type="checkbox"/>	Relocations	
<input type="checkbox"/>	Expansions	
<input type="checkbox"/>	Acquisitions	
<input type="checkbox"/>	Consolidations	
<input type="checkbox"/>	Weather-related or force majeure events	
<input type="checkbox"/>	Other (e.g., revised labor agreements, technology)	

II-2b. **Anticipated changes in operations.** Does your firm anticipate any changes in the character of its operations or organization (as noted above) relating to the production of LBCCs in the future?

<b>No</b>	<b>Yes</b>	<b>If yes, supply details as to the likely timing, nature, and significance of such anticipated changes and describe the underlying assumptions and business reasons for them.</b>
<input type="checkbox"/>	<input type="checkbox"/>	

- II-3a. **Production using same machinery.** Please report your firm's production of products using the same equipment, machinery, or employees as used to produce LBCCs, and the combined capacity (both installed and practical capacity) on this shared equipment, machinery, or employees in the periods indicated.

**"Installed overall capacity"** —The level of production that your establishment(s) could have attained, assuming your firm's *optimal* product mix, and based solely on *existing capital investments*, i.e., machinery and equipment that is in place and ready to operate. This capacity measure does not take into account other constraints to production such as existing workforce constraints, availability of raw materials, or downtime for maintenance, repair, and clean-up. This capacity measure is sometimes referred to as "nameplate" or "theoretical" capacity.

**"Practical overall capacity"** —The level of production that your establishment(s) could reasonably have expected to attain, taking into account your firm's *actual* product mix over the period. This capacity measure is based on not only existing capital investments, i.e., machinery and equipment that is in place and ready to operate; but also non-capital investment constraints, such as (1) normal operating conditions, including normal downtime for maintenance, repair, and cleanup; (2) your firm's existing in place and readily available labor force; (3) availability of material inputs; and (4) any other constraints that may have limited your firm's ability to produce the reported products. Importantly, this capacity measure is the maximum "practical" production your firm could have achieved without hiring new personnel or expanding the number of shifts operated in the period.

**"Practical LBCC capacity"** —The level of production of LBCCs that your establishment(s) could reasonably have expected to attain. The same assumptions apply to this capacity measure as for practical overall capacity, but only includes the portion of practical overall capacity allocated to the production of LBCCs based on the actual product mix experienced over the period.

**"Production"** —All production in your establishment(s) in Japan, including production consumed internally within your firm and production for another firm under a toll agreement.

Takes into account	Installed overall capacity	Practical overall capacity	Practical LBCC capacity
Existing capital investments	Yes	Yes	Yes
Product mix	Yes	Yes	Yes
Normal downtime, maintenance, repair and clean-up	No	Yes	Yes
Existing labor force	No	Yes	Yes
Availability of material inputs	No	Yes	Yes
Actual number of shifts and hours operated	No	Yes	Yes
Limited to LBCCs	No	No	Yes

II-3a. **Production using same machinery. Continued**

Item	Quantity (in units)		
	Calendar year		
	2022	2023	2024
<b>Capacity measures:</b>			
Installed overall capacity <sup>1</sup>			
Practical overall capacity <sup>1 2</sup>			
Practical LBCC capacity <sup>3 4</sup>	0	0	0
<b>Production of:</b>			
LBCCs <sup>3 4</sup>	0	0	0
Other products <sup>5</sup>			
Total production using same machinery or workers	0	0	0
<sup>1</sup> Data reported for both "installed overall" and "practical overall" capacity should each individually be greater than data reported for total production (last line). Additionally, data reported for "installed overall" capacity should be greater than "practical overall" capacity in every period. <sup>2</sup> Please provide details in your response to the question on capacity constraints in question II-3d below that explain the differences reported between "installed" and "practical" overall production capacities. <sup>3</sup> Data entered in question II-9 for this indicator will populate here. <sup>4</sup> Data reported for practical LBCC capacity should be greater than the data reported for production of LBCCs in each period, if not revise prior to submission to the Commission. Additionally, if your firm reports the production of no other products on the same machinery and using the same workers as LBCCs then "practical overall" and "practical LBCC" capacity measures should be equal to each other. <sup>5</sup> Please identify these products: _____.			

II-3b. **Operating parameters.** The *practical* overall capacity reported in II-3a is based on the following operating parameters:

Hours per week	Weeks per year

- II-3c. **Capacity calculations.** Please describe the methodology used to calculate *installed* and *practical* overall capacities reported in II-3a, and explain any changes in reported capacities.

--

- II-3d. **Practical overall capacity constraints.** Please describe the constraint(s) that set the limit(s) on your firm's practical overall capacity over the period reported in question II-3a. If different constraints were binding over different periods reported, please specify when each constraint was limiting your reported practical overall capacity. If a constraint was not actually binding over the period reported, but was still a constraint to achieving the installed capacity level, indicate at what level it would have been binding.

Constraint (check as many as appropriate)		Description (If checked, please describe the details, timing, and duration of the constraint; leave completely blank if not applicable)
<input type="checkbox"/>	Production bottlenecks	
<input type="checkbox"/>	Existing labor force	
<input type="checkbox"/>	Supply of material inputs	
<input type="checkbox"/>	Fuel or energy	
<input type="checkbox"/>	Storage capacity	
<input type="checkbox"/>	Logistics/transportation	
<input type="checkbox"/>	Other constraints (list the specific constraints in the description field)	

- II-3e. **Reaching installed overall capacity.** Please describe and quantify the amount of time it would take and the additional actions that would be needed (e.g., hiring new workers, expanding shifts, procuring larger sources of raw material supply, etc.) for your firm to be able to fully utilize the installed overall capacity reported in II-3a.

--

- II-3f. **Excess installed overall capacity.** To the extent that your company is reporting excess installed overall capacity, please report, with specificity: (1) which machines or equipment (or other elements of production) would need to be brought back into production for your plant to operate at full capacity, and (2) the specific dates on which such machines or equipment were last used by your plant to produce LBCCs.

--

- II-4. **Product shifting.**

- (a) Is your firm able to switch production (capacity) between LBCCs and other products using the same equipment and/or labor?

No	Yes	If yes (i.e., have produced other products or are able to produce other products), please identify other actual or potential products.
<input type="checkbox"/>	<input type="checkbox"/>	

- (b) Please describe the factors that affect your firm's ability to shift capacity between products (e.g., time, cost, relative price change, etc.), and the degree to which these factors enhance or constrain such shifts.

--

- II-5. **Capacity checklist.** Please check that the capacity numbers reported in question II-3a follow the Commission's relevant definitions for capacity.

Item	✓ if Yes
Are all three capacity measures reported based on <u>currently installed machinery and equipment</u> (i.e., the reported capacity level would not require additional capital investments in order to achieve)?	<input type="checkbox"/>
Are practical overall capacity and practical LBCCs capacity measures reported based on <u>existing labor force</u> (i.e., the reported capacity level would not require hiring additional production related workers or adding shifts)?	<input type="checkbox"/>
Are practical overall capacity and practical LBCC capacity measures based on <u>the actual availability of material inputs</u> ?	<input type="checkbox"/>
Do both practical overall capacity and practical LBCC capacity measures account for <u>normal downtime, maintenance, repair and clean-up</u> activities?	<input type="checkbox"/>
Does the difference between practical overall capacity and practical LBCC capacity equal the portion of practical overall capacity that is dedicated to the production of out-of-scope products?	<input type="checkbox"/>

Note: If your firm is not able to answer "yes" to any of the above criteria as it relates to your firm's reported capacity levels, please revise your capacity numbers to be in conformance with the appropriate definition prior to submission to the Commission.

- II-6. **Share of sales.** What percentage of your firm's total sales in its most recent fiscal year was represented by sales of LBCCs? \_\_\_\_\_ percent.
- II-7a. **Firm's estimated share of production in Japan.** Please estimate the percentage of total production of LBCCs in the country specified on the certification page accounted for by your firm's production in 2024. \_\_\_\_\_ percent.
- II-7b. **Firm's estimated share of exports from Japan.** Please estimate the percentage of total exports to the United States of LBCCs from the country specified on the certification page accounted for by your firm's exports in 2024. \_\_\_\_\_ percent.
- II-8. **Third country trade actions.** Are the LBCCs exported by your firm subject to antidumping duty/safeguard findings, remedies, or proceedings?

No	Yes	If yes--List the products(s), countries affected, and the date of such findings/remedies/proceedings.
<input type="checkbox"/>	<input type="checkbox"/>	

- II-9. **Trade data.** Report your firm's capacity, production, shipments, and inventories related to the production of LBCCs in your establishment(s) in Japan during the specified periods. Do not include resales of LBCCs that your firm did not produce in this question; those data to the degree they are exported to the United States should only be reported in question II-10.

Do not submit data by manufacturing facility if they are in the same country. If your firm has multiple manufacturing establishments within one country, you are required to combine data for those establishments within one foreign producer questionnaire response.

***"Shipments"*** —Shipments of products produced in your establishment(s) in Japan. Quantities reported should be net of returns.

***"Home market commercial shipments"*** —Shipments, other than internal consumption and transfers to related firms, within Japan.

***"Home market internal consumption/transfers to related firms"*** —Shipments made to related firms in Japan, including product consumed internally by your firm.

***"Export shipments"*** —Shipments to destinations outside of the country indicated on page 1 (Japan), including shipments to related firms.

***"Inventories"*** —Finished goods inventory, not raw materials or work-in-progress.

*Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the trade data, as Commission staff may contact your firm regarding questions on the trade data. The Commission may also request that your company submit copies of the supporting documents/records (such as production and sales schedules, inventory records, etc.) used to compile these data.*

II-9. **Trade data.** *Continued.*

Item	Quantity (in units)				
	Actual experience			Projections <sup>1</sup>	
	Calendar year			Calendar year	
	2022	2023	2024	2025	2026
<b>Practical LBCC capacity<sup>2</sup> (A)</b>					
<b>Beginning-of-period inventories (B)</b>					
<b>Production<sup>2</sup> (C)</b>					
<b>Home market shipments:</b> Internal consumption/ transfers (D)					
Commercial shipments (E)					
<b>Export shipments:</b> to the United States (F)					
to all other markets (G) <sup>3</sup>					
<b>Total exports (H)</b>	0	0	0	0	0
<b>Total shipments (I)</b>	0	0	0	0	0
<b>End-of-period inventories (J)</b>					
<sup>1</sup> Explain the basis of your firm's projections: _____. <sup>2</sup> Report your firm's practical LBCC capacity and production consistent with the definitions and instructions included in question II-3a. <sup>3</sup> Identify your firm's principal other export markets: _____.					

**RECONCILIATION OF SHIPMENTS, PRODUCTION, AND INVENTORY.** Generally, the data reported for the end-of-period inventories (i.e., line J) should be equal to the beginning-of-period inventories (i.e., line B), plus production (i.e., line C), less total shipments (i.e., lines D, E, F, and G). Please ensure that any differences are not due to data entry errors in completing this form, but rather actually reflect your firm's records; and also provide any likely explanations for any differences (e.g., theft, loss, damage, record systems issues, etc.) if they exist.

Item	Actual experience			Projections	
	Calendar year			Calendar year	
	2022	2023	2024	2025	2026
B + C – D – E – F – G – J = should equal zero ("0") or provide an explanation. <sup>1</sup>	0	0	0	0	0
<sup>1</sup> Explanation if the calculated fields above are returning values other than zero (i.e., "0") but are nonetheless accurate: _____.					

- II-10. **Exports to the United States not produced by your firm.** Report your firm's exports to the United States of LBCCs that were produced in Japan but not by your firm during the specified periods. Note these data should **not** be included in question II-9.

Quantity ( <i>in units</i> )					
Item	Actual experience			Projections	
	Calendar year			Calendar year	
	2022	2023	2024	2025	2026
Exports of LBCCs to the United States not produced by your firm <sup>1</sup>					
<sup>1</sup> List the producer(s). _____.					

- II-11. **Other explanations.** If your firm would like to further explain a response to a question in Part II for which a narrative box was not provided, please note the question number and the explanation in the space provided below. Please also use this space to highlight any issues your firm had in providing the data in this section, including but not limited to technical issues with the MS Word questionnaire.

**Correcting Valid number error messages.** If you are completing this questionnaire in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. This issues stem from your computer number formatting setting (e.g., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (,) delineate multiples of 1000 and periods (.) delineate fractions less than one. Many EU countries use the reverse where multiples of 1000 are delineated with periods (.) and fractions less than one are delineated with commas (,). This questionnaire is prepared in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU number formatting, we believe this may cause this issue.

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tab
- Change the Format from your existing one (e.g., "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the USITC foreign producer questionnaire form. When you finish reporting the data then you can close the questionnaire and switch back to your country settings.

# HOW TO FILE YOUR QUESTIONNAIRE RESPONSE

This questionnaire is available as a “fillable” form in MS Word format on the Commission’s website at:

[https://usitc.gov/reports/active\\_import\\_injury\\_questionnaires](https://usitc.gov/reports/active_import_injury_questionnaires).

***Please do not attempt to modify the format or permissions of the questionnaire document.*** Please submit the completed questionnaire using one of the methods noted below. If your firm is unable to complete the MS Word questionnaire or cannot use one of the electronic methods of submission, please contact the Commission for further instructions.

- **Upload via Commission’s secure submission portal.** The questionnaire must be uploaded in two formats: (1) a Microsoft Word document; and (2) a PDF copy of the complete questionnaire with a signature on the first page. Please include any attachments at the end of the PDF (e.g., APO certification, additional comments, etc.).

**Web address:** <https://usitc.gov/qportal>

**Pin:** LIFT

**Phase:** Preliminary

- **E-mail.** E-mail the MS Word questionnaire to [Laurel.Schwartz@usitc.gov](mailto:Laurel.Schwartz@usitc.gov); include a PDF copy of the complete questionnaire with a signature on the first page. Submitters are strongly encouraged to encrypt nonpublic documents that are electronically transmitted to the Commission to protect your sensitive information from unauthorized disclosure. The USITC secure submission portal and the Electronic Document Information System (EDIS) use Federal Information Processing Standards (FIPS) 140-2 cryptographic algorithms to encrypt data in transit. Submitting your nonpublic documents by a means that does not use these encryption algorithms (such as by email) may subject your firm’s nonpublic information to unauthorized disclosure during transmission. If you choose a non-encrypted method of electronic transmission, the Commission warns you that the risk of such possible unauthorized disclosure is assumed by you and not by the Commission.

**If your firm did not produce or export this product,** please fill out page 1, print, sign, and submit a scanned PDF copy via the Commission’s secure submission portal or email.

**Parties to this proceeding.** If your firm is a party to this proceeding, it is required to serve a copy of the completed questionnaire on parties to the proceeding that are subject to administrative protective order (see 19 CFR § 207.7). A list of such parties may be obtained from the Commission’s Secretary (202-205-1802). A certificate of service must accompany the completed questionnaire you submit (see 19 CFR § 207.7). Service of the questionnaire must be made in paper form.
