Thank you for allowing me an opportunity to speak with you about the need to support and continue the Farm to School 2027 project. As a former principal and current community leader, I have first hand knowledge of the importance of whole learning. Having direct access to the best our country can provide its citizens is a must! Our brightest students are the ones who receives nutritious meals daily. Wholesome and delicious meals are the building blocks for good health. With so many concerns regarding mental, physical and spiritual health of our nation and our schools , we need to provide our citizens and our children with the best our farms can give.
