Subject: HVAC upgrades

Frank,

As a small HVAC contractor located in CT. how can I partner with a local government agency to perform some of the upgrades that are being done. None of our state or local people that I have spoke to seem to know what these programs are all about or who is carrying them out. I'm not seeing these projects in the government bids locally.

Any info you can provide would be appreciated.

*Thank You,
Thomas Frizell*
