**Subject:** Monthly Reporting\_ a Traffic Jam

Mr. Norcross,

DOE has undertaken a monumental task in attempting to manage quarterly reporting. Monthly reporting would create a traffic jam of errors, duplicates and redundancies. The result would be less information flow, not more. If you think that more is better, check out traffic flow at 5:00 PM on your way home. Monthly reporting would triple the amount of traffic flow on the information highway.

We need to use EECBG funds to employ contractors who put men and women to work building the new energy infrastructure. More administration will mean less new infrastructure. That's a bad choice all around.
