Hello, my comments on the FAFSA are as follows:
- Remove gender question altogether
- Fix the email students get when they log in that says "your FSA ID info has changed". It should read "someone has accessed your account, if not you…"
- Fix the prototype so that it mimics the real site in real time and mobile friendly (if using going forward?)
- Make the error messages mean something – actually point to the issue, and include steps to fix it.
- Make the Household size visible without having to check "yes"
