Docket(CPSC-2009-0102)
The request on an extension of approval of information collection to obtain data and consumer product related injuries and follow up should be approved. This is because they were able to obtain evidence and information from the collection in order to support and provide educational campaigns of what they found. I do believe that the collection of information described above is necessary for the proper performance of the commission's function. All the information provide were vailed arguments and evidence that showed the impact of having save products. Along with that the information presented was clear, right to the point and very important.
