The proposed regulation would be beneficial for the veterans or disabled veterans who have suffered from chronic pain and illnesses. To be able to support them with housing needs and provide care for those who have experienced severe conditions throughout their tenure of service. It also provides for those with chronic conditions to receive medical care treatment for the future health care that may be necessary. This provision would also the benefit of veterans assurance of housing and other services needed in order to live in their country served and to be treated appropriately for doing so.
