For Updated Summary of Enhancements to the 2026-27 FAFSA form:

Please make the High School Completion fields a requirement to be answered for all students with high school diploma/GED/State Equivalent/Home Schooled, School Name, city, and State regardless of their classification (undergraduate, graduate, or doctoral. These fields are required for federal student aid, and if answered with None of the above or none then it prevents aid disbursement. Schools then have to hunt for the information and ask students to provide documentation which is burdensome for schools and it frustrates students. If all students are required to answer all of the high school fields (and won't allow them to move forward with other questions until answered), then that is an easy solution for students and schools.
