General Comment

Medicaid cannot be used to subsidize the lifestyles of illegals. More checks and security must be installed so only U.S. citizens can use Medicaid. As CNN reported in 2023, Medicare and Social Security insolvency is right around the corner. More and more people take out of Medicaid that give into it. This is because illegals can claim Medicaid for “emergency” situations which are subject to no second check. This results in a blank cheque by the taxpayer to people who have never paid taxes for issues that were never emergencies. a little-known part of the state-federal health insurance program for the poor pays about \$2 billion a year for emergency treatment for a group of patients who, according to hospitals, mostly comprise illegal immigrants. Most of it goes to reimburse hospitals for delivering babies for women who show up in their emergency rooms, according to interviews with hospital officials and studies. This provides another reason that anchor babies should be outlawed. A 2007 medical article in the Journal of the American Medical Association reported that 99 percent of those who used Emergency Medicaid during a four-year period in North Carolina were thought to be illegal immigrants.
