General Comment

this division considers all information confidential as evidenced by the foia request submitted by Aaron siri for information which was answered by this agency saying that they would not release ordinary information for 96 years. certainly that proves they want no information to leave their site. I find that not conducive to our govt, which is to be open and transparent. I see no reason why it is so difficult even for white coat waste to have to ask time and again for information on dog and cat experiments brutally performed with murder of those animals unless they try over and over again to gain information on the grants that go out from this horrible agency this agency wants to operate in the shadows and so it is not conducive to an American agency., we want change. I do not think the actions of this agency are beneficial to American people at all. I think this agency treats all information as sneaky they have miniscule open meetings. we need to adopt a more openpolicy. I see no reason for sneakiness in sound decent honest healthcare. it should be open.i ask for no funding for this operation anymore. it should be totally ddefunded. it is at all times negative to the American people instead of cooperating with the American people, who are bankrupted to fund these agenciess in the trillions of dollars they demand.
