2130-0526

This contract is unlawful due to regulatory violations. Somewhere along the lines of this contract renewal, new data was inappropriately inserted into the contract. The Federal Railroad Administration is not a rule making agency in the OMB system.

Of course, there should be regulations around railroad accidents, for drug testing and random drug testing purposes in all workplace cases that are associated with an accident or injury. This contract is in need of modification and regulation review by the Department of Transportation agency and a new contract for the project should be implemented, as appropriate for compliance of this agreement.
