The Detailed Reporting on Student Performance on Math & Reading Tests is more than just an assessment package. This assessment on math and reading is a critical instrument to guide the quality and effectiveness of our schooling system. Furthermore, it serves as a predictive instrument to gauge the future direction of our societal priorities. The Detailed Reporting on Student Performance on Math and Reading cannot, and must not, be taken too lightly. The Detailed Reporting cannot be emphasized enough in terms of its value to the well-being of our society. I speak as a retired Superintendent of Schools. Thank you. Harold G. Begay, Ph.D.
