I am writing to express my disagreement with the May 2025 proposal to continue the limited EDFacts data collection and also my your support of the November proposed change for state educational agencies to report multiple performance levels on math and reading assessment results for students for grades 4 and 8 to EDFacts.

I write blog posts for a community publication in the Seattle area. I use educational data in some of my stories. More data is more better! So please don't go forward with the May proposal.
