Subject: [EXTERNAL] HRSA/OPTN Data Collection Comment
Date: Friday, January 3, 2025 10:16:44 AM

I would like to comment in regard to the data collection for the pre-waitlist information on potential transplant candidates.

I believe there are good intentions behind the proposal, but the current proposal would create unnecessary workflow burdens to transplant programs that are already running lean and would have to re-direct efforts from other activities to meet the needs to this data collection. It is not compliant with the Paperwork Reduction Act and I'm not sure the effort would add the benefit sought. If the OPTN would like to do something similar, the organization should seek to minimize the burden on the centers that are already producing many forms of data to OPRN.

I am willing to help identify other solutions that may help drive this forward, but with less unnecessary burden for the transplant centers.
