Dear HHS and HRSA team,

I support the proposed HRSA data collection because it will address disparities in transplant access, improve transparency, and enhance donor management practices. This is an important step toward saving more lives and ensuring equitable care for all patients.

Collecting pre-waitlist and donor referral data will provide critical insights into:

- Who gets referred and evaluated for a transplant.
- Where inequities exist and how we can close those gaps.
- How to better support donor families and improve care.

Sincerely,

Wendy Lo
