Subject: [EXTERNAL] Potential_SPAM:supporting data collections
Date: Monday, December 30, 2024 5:04:17 PM

I support the proposed data collection as it will help identify and address disparities in access to transplantation. Collecting pre-waitlist referral and evaluation data is essential to understanding who is being referred, evaluated, and listed for transplant and ensuring equitable access for all patients. The proposed forms will improve transparency in organ donation by monitoring organ procurement practices and transplant center performance. etc. I need a liver transplant. By submitting this I am completely supporting the fact findings and research. thank you for your time.

sincerely,

Terri Powell
